## PowerShell for Visual Studio Code

Azure Pipelines **failed** VS Marketplace **v2023.2.1** installs **7.79M** #vscode **2624 online**

[Join the chat on Gitter](#)

This extension provides rich PowerShell language support for [Visual Studio Code \(VS Code\)](#). Now you can write and debug PowerShell scripts using the excellent IDE-like interface that VS Code provides.

This extension is powered by the PowerShell language server, [PowerShell Editor Services](#). This leverages the [Language Server Protocol](#) where [PowerShellEditorServices](#) is the server and [vscode-powershell](#) is the client.
